

## THE VOICE OF REASON

April 2009

LOS ANGELES CENTER OF  
RELIGIOUS SCIENCE

*Making A Difference*

**Y**ou were created out of Life to be Life's highest expression of Itself. The reason you hold this place in the scheme of things is because you represent Life's most important assets — Its power, Its perfection, Its completeness and Its ability to create.

Consciously or unconsciously, you have been using your power to create your experience of life. You've created some good experiences and undoubtedly, like most people, some experiences that were less than good.

Whether we use scientific information that explains the technical reasons why we ought to use

our minds constructively, or suggestions that we hear elsewhere, it just makes good sense. Why? Because we intuitively know how powerful our minds are.

**Pay  
Attention!**

**Dr. David J. Walker**

Whatever prompts you to pay attention to what's going on in your mind and change the negative into the positive, use it — whether it's a 12-step program, the Bible, a book of psychology, or the Science of Mind.

Decide that from now on you're going to pay attention to what is going on in your mind. There is not only a sound scientific rationale for making

sure that what's going on is constructive, it's also a practical way to go through life.

## *Ernestly Speaking . . .*

Youth is not entirely a time of life — it is a state of mind. It is not wholly a matter of ripe cheeks, red lips, or supple knees. It is a temper of the will, a quality of the imagination, a vigor of the emotions, a freshness of the deep springs of life. It means a temperamental predominance of courage over timidity, of an appetite for adventure

over love of ease.

Nobody grows old by merely living a number of years; people grow old only by deserting their ideals. Years may wrinkle the skin, but to give up interest wrinkles the soul. Worry, doubt, self-distrust, fear, and despair — these are the long, long years that bow the head and turn the growing spirit back to dust.

## I HAVE THE CONSCIOUSNESS OF PERFECT RIGHT ACTION

There is One Creative Intelligence that is the One Original Source of everything. This Creative Intelligence or Divine Mind created me out of Itself and directs me to my highest good by working through me and as me. I am this Creative Intelligence individualized in human form.

This creative Intelligence is perfect in all ways and never makes mistakes of any kind. I honor the highest good in me and the highest good for all others by taking perfect right action. Through the One Creative Intelligence, I instinctively know what actions to take at every moment to create the life I desire.

The One Creative Intelligence quiets my mind so I can listen to the wisdom of Divine Spirit. This is the sustenance of my life.

I listen for guidance and am rewarded with certainty, confidence and security from the flow of Spirit through me and all of my endeavors. I embody the right thoughts and execute the right actions to demonstrate my highest good.

With gratitude and thanksgiving, I know clarity of thought and the power of Spirit are mine now. And so it is.

# Entitlement

ERIC BUTTERWORTH

**T**he basis of entitlement is the startling assertion: The Universe owes you a living! Yes, we are saying owes you a living! Note: We are not saying that the world owes you a living. Actually. The world owes you nothing. You are a creative expression of the Universe, with the responsibility to let your light shine. Thus you owe the world a life. But in all the many ways in which you apply yourself in the world, the Universe owes you complete support.

## RELEASING YOUR POTENTIAL

**O**ur deepest desire is to be able to fulfill our potential by contributing something meaningful to life. As spiritual beings we have limitless potential for expression. Therefore, we should realize that the desire is an innate one. Knowing how to bring it about can be difficult when we don't understand this or know where to begin.

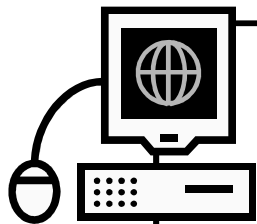

A caterpillar has the potential to fly, but until a transformation of consciousness takes place he cannot fulfill his creative potential. Likewise, we must be willing to change our old mind sets. These are those inhibiting beliefs we hold about ourselves.

There is only one way we can release our potential for new expression and that is to have a change of consciousness. We must see our-

selves from a whole new perspective. Unless we are willing to drop the old patterns of thinking we continue to inhibit ourselves and our expression of life.

As spiritual beings there are really no limits to what we can know, be and express. When we begin to know this about ourselves we are ready to move beyond our past patterns.

The place to begin is in your own mind by lifting your beliefs to a new dimension. Commence to see yourself free. When the caterpillar realized a change of consciousness he took wing and experienced a whole new dimension of his being. You and I can do this, too, when changes take place in our attitudes, beliefs and consciousness.

AND RECOVERY**

- In four weeks we will cover the twelve steps of recovery and the spiritual principles behind both the Science of Mind and recovery.
- Have you ever wondered how you can be powerless and powerful at the same time?
- How can I surrender my will and life to a higher power when I am that higher power?
- Why is it necessary to take a moral inventory when I have already gotten on with my life?

# The Spider's Web

By Jay K. Johnson

In a seldom used dusty old storage space,  
I spotted a beautiful spider's webbed lace.  
The work that it took to create such a sight  
Must have taken a spider all day and all night.  
A marvelous feat of a spider's great skill,  
Anchored securely from the walls to the sill.  
With no more time for a web on this day  
In a wave of my hand I swept it away.  
As the fragments of gossamer swept past my face,  
I crushed a small world and I left not a trace.  
A spider now homeless and jobless it seems  
I killed spider hopes and all spider dreams.  
A day and a night to a spider must be  
A month of hard work to you and to me.  
What is contained in the spider's small id  
That lets him create such an outstanding grid?  
Do spiders get down and go through a depression  
At seeing the end of their only expression?  
Do spiders hire therapists just to ask why?  
Do they cry and get mad, or curse God and die?  
Spiders don't scream out to God "We can't take it"  
Or worry of webs and the time spent to make it.  
At losing a web they don't run to their mother  
They simply get busy and create another.
